- **We power 30M+ phone numbers, 5B+ SMS, 17B+ min**
- **Some of our customers:**

Quick History

Quick Grounding - What is republic wireless?

Android Powered Smartphone:

Custom Android powered phones with **native dialer** Hybrid Calling. It **leverages Wi-Fi for Voice, Text and Data**. It runs on Sprint's nationwide cell network when away from Wi-Fi.

VoIP:

Voice data is transmitted over Bandwidth.com's **proprietary VoIP network**; the same network powers services such as Google Voice and Skype.

**Our Terms of Service permit us to reduce your speed for a billing period if you exceed 5GB of data while using cell during the billing period.
We also give you a break and will forgive you for exceeding 5GB of data once every 6 months! See our Terms of Service for more details.*

Comparisons OTT Apps vs. Republic Wireless

Attribute	OTT APP -  	Republic Wireless
How to Acquire	Requires download	Integrated into device “out of the box”
Where it can be used	Only in Wi-Fi	Anywhere, Wi-Fi or Cellular
Management	Requires App to be running and requires 2 numbers	One number no management by Customer
Demographics	Early adopter and teenage, tech savvy	Anyone who uses a smartphone
Quality of Call	Uses Android SIP stack and Wi-Fi management	Specifically developed software deeply integrated into the device
SMS	Requires a second application and often a different phone number	All native, no app, no management and the same phone number

OTT applications require download, account establishment and configuration. They are also limited to only Wi-Fi. When outside of Wi-Fi a second phone number is required. SMS is a separate application. As long as these parameters exist, OTT will always be niche.

The Game Changer

Just a few recent headlines...

“Has Republic Wireless got a deal for you.”

**USA
TODAY**
A GANNETT COMPANY

“Most Popular Prepaid Cell Phone Carrier:
Republic Wireless.”

lifehacker

“A Smartphone with Wifi Smarts.”

THE WALL STREET JOURNAL.

“Republic Wireless: Game Changer in
Revolution against AT&T and Verizon.”

THE HUFFINGTON POST

“How plain, old Wifi will revolutionize
the cellular industry.”

The Washington Post

“With plans starting at \$5, Republic Wireless
looks more un-carrier than T-Mobile.”
